

# Chain Drive Pin & Bushing Lube

**PRODUCT DESCRIPTION:**

Chain Drive Pin & Bushing Lube is a premium product compounded for severe industrial applications, including high loads and ambient conditions that can cause premature wear and failure to heavy-duty industrial chains.

**PRODUCT BENEFITS:**

Conventional oils can pick up dust, forming abrasive grinding compounds which accelerate wear and reduce chain life. Chain Drive Pin & Bushing Lube eliminates this problem by penetrating and leaving outer surfaces comparatively dry. The additive solids are attracted to and deposited into the pores of the metal at the points where wear will occur first. After the oil has penetrated, the chains will appear to have a high polish. Close inspection will reveal a film of lubricant with no signs of scuffing, scoring or flaking on the load-carrying surfaces. Chain Drive Pin & Bushing Lube is NSF H2-registered and is formulated with:

- Top quality base oils
- Antiwear additives
- Extreme-pressure additives
- Corrosion inhibitors
- Pour point depressant
- Synthetic tackifier

**TECHNICAL DATA:**

Propellant:	Butane and Propane
Flash Point:	399°F (204°C) Oil, typical
Pour Point:	-22°F (-30°C) Oil, typical
Spray Pattern:	Narrow Stream
Viscosity:	32.2 cSt @ 40°C; 5.4 cSt @ 100°C, VI = 101, typical
Texture:	Medium Foaming Oil
Appearance:	Amber
Consistency:	Medium/Heavy
Specific Gravity:	0.87 for concentrate

**AEROSOL PACKAGING:**

Available in 12 oz. net weight aerosol cans (12/case) – Part # JAX102

**BULK PACKAGING:**

Gallons (4/case) and 35-pound pails – Part # 00202

Trigger spray bottles (16 fl. oz, 12/case) – Part # 102TS-007

Refills for trigger spray bottles, Gallons (4/case) and 35-pound pails – Part # 102TS

Nonfood Compounds  
Program Listed H2  
Reg. # 133893 (Aerosol)  
Reg. # 017533 (Bulk)

RE: JAX CHAIN DRIVE PIN & BUSHING LUBE (Aerosol)  
Category Code: H2  
NSF Registration No. 133893

Dear Ms. Patty Riek:

NSF has processed the application for Registration of **JAX CHAIN DRIVE PIN & BUSHING LUBE (Aerosol)** to the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2004), which are available at <http://www.nsf.org>. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling.

**This product is acceptable as a lubricant where there is no possibility of food contact (H2) in and around food processing areas. Such compounds may be used as lubricants, release agents, or antirust films on equipment and machine parts in locations in which there is no possibility of the lubricant or lubricated part contacting edible products.**

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, and the registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (<http://www.nsf.org>). The NSF Registration Mark can be downloaded from the NSF website, at [http://www.nsf.org/business/about\\_NSF/nsf\\_marks\\_download.asp](http://www.nsf.org/business/about_NSF/nsf_marks_download.asp).

NSF Listing of all registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF web site, at <http://www.nsf.org>. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

Carmen Grindatti  
NSF Nonfood Compounds Registration Program
